## WEB-BASED MACHINE CONDITION MONITORING

AltaView is an open architecture web-based turbomachinery condition monitoring system providing live machine status, dynamic data review (time waveform and spectrum), and historical trend data for any dynamic or process signal.

### FLEET HIERARCHY

Easily navigate to specific machine data by clicking on a plant or machine icon.

### DISPLAY TABS

Quickly jump between data displays by clicking on Tabs.

### MEASUREMENT TABLE

Customized tables allow the operator to see the desired measurements for each vibration and process machine point.

### COLORED CODED STATUS

Customizable colored icons show the current status of plants and machines.

### DATA TREND

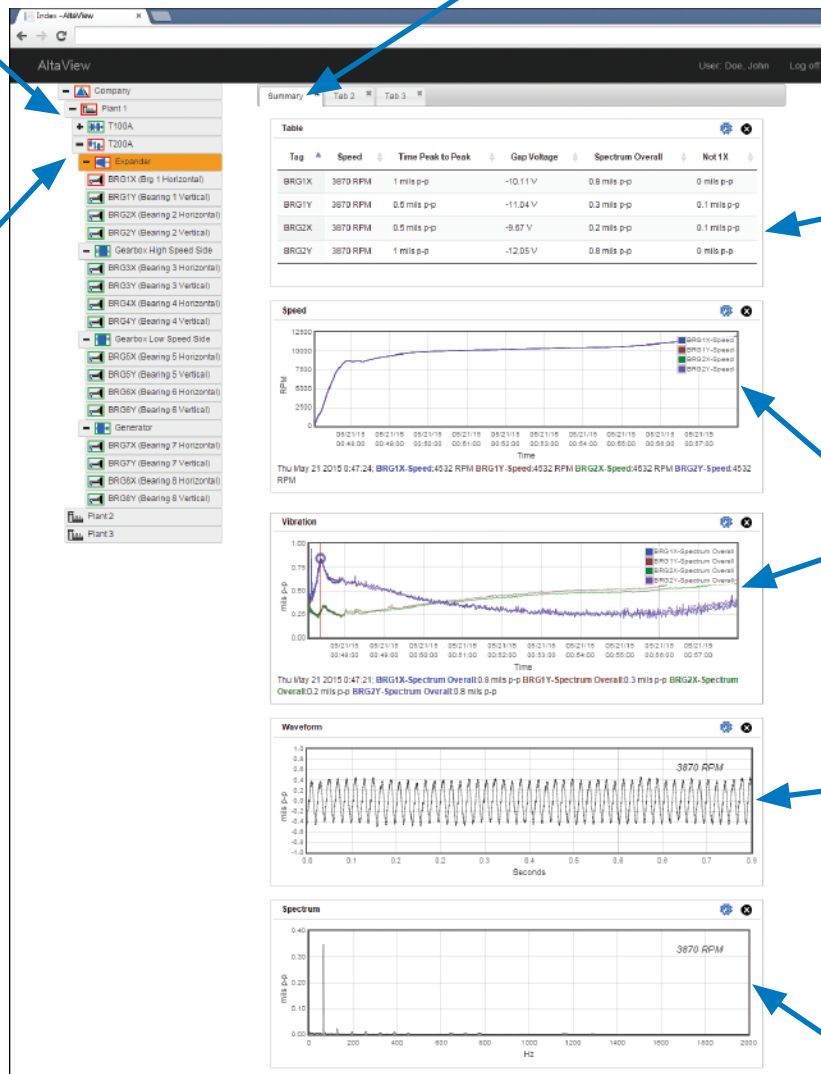

Observe the machine historic behavior by analyzing the trend of the vibration, gap voltage, phase, process and speed.

### TIME WAVEFORM PLOT

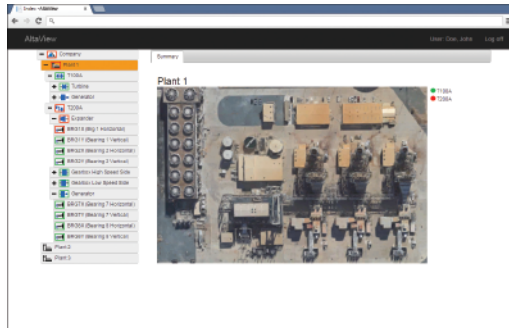

Observe a live or historical dynamic time waveform for each point.

### SPECTRUM PLOT

Observe a live or historical spectrum for each point.

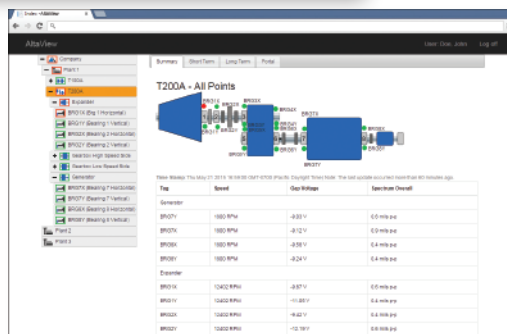

*Quickly Drill Down Through To See Machine Status*

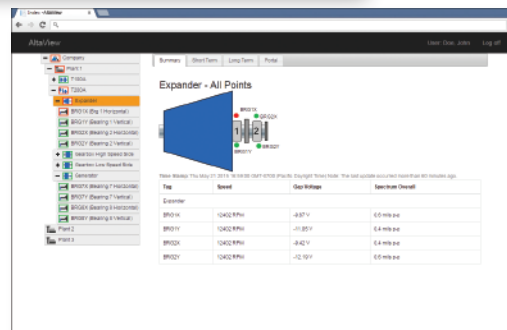

### PLANT VIEW

View the status of all the machines in the plant or company and quickly identify machines in alarm.

### MACHINE VIEW

Shows current status of an individual machine and its measurement points, using a machine graphic and measurement tables.

### COMPONENT VIEW

Shows an individual machine case, the machine graphic, the status of each point, and related tabular machine data.

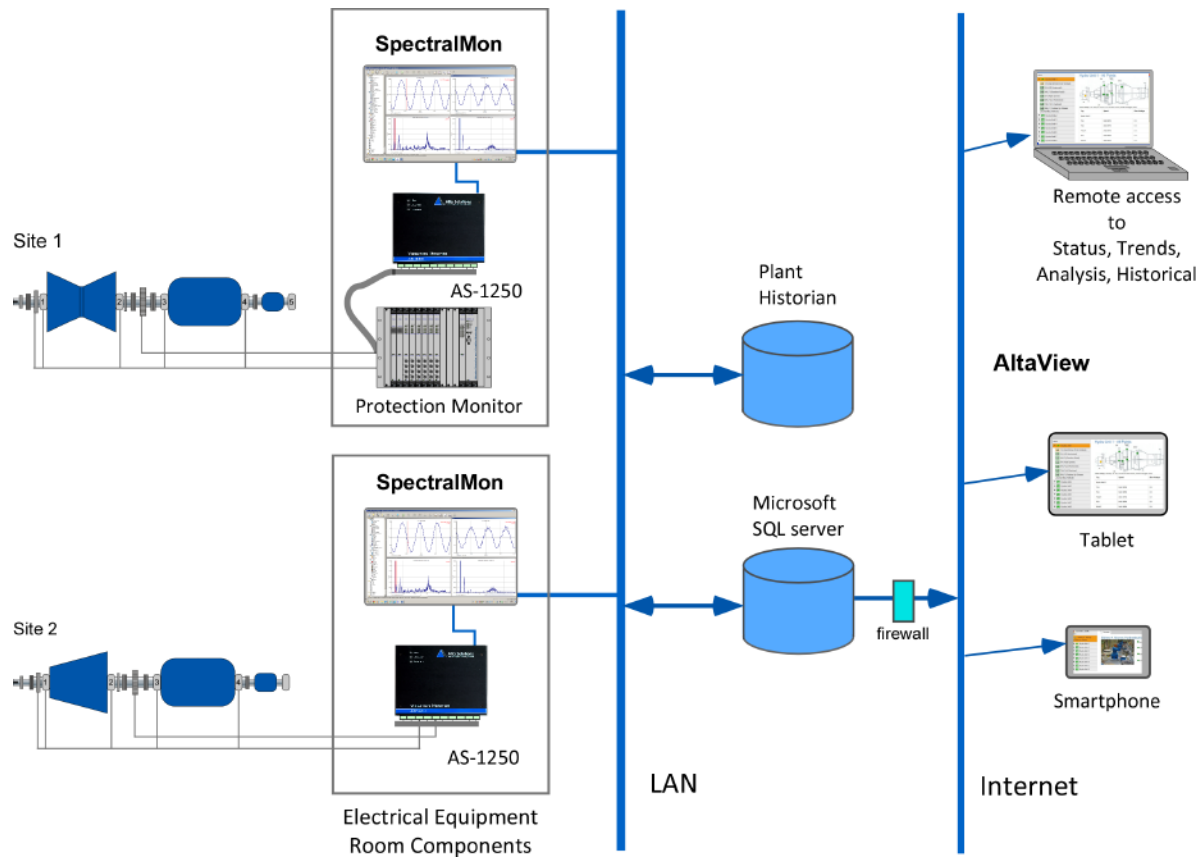

### MACHINE POINT VIEW

Shows the detailed trend and dynamic data for each machine point.
